

Unlike a traditional RDP thin client, the TC10 is for demanding users that require real time PC-like capability such as financial traders and power users such as CAD engineers.

IBM Part Number: CP20

Devon IT TC10 Desktop Access Device

Optimized for PC-over-IP™ Remote Workstations

The TC10 is the highest performance desktop access device in the world. It is the first desktop access device that gives the end user a true PC experience with instant screen updates, full multimedia support, and complete USB compatibility. It connects to remote workstations using PC-over-IP™ technology.

Unlike a traditional RDP thin client, the TC10 is for demanding users that require real time PC-like capability such as financial traders and power users such as CAD engineers. The TC10 is helping companies go green by dramatically reducing power, cooling, noise and clutter. In addition, the TC10 manages growth by providing a more resilient environment that can increase reliability and availability.

Devon Connection Manager is software that manages the connection between the TC10 desktop access device and a remote workstation. In complex environments, the ability to manage these dynamic connections is crucial. Devon Connection Manager allows administrators to quickly define how they want to connect clients to remote workstations, and supports both fixed and free seating.

▶ Enables truly stateless, secure, and unmanaged user desktop appliances without any local user application execution	▶ No drivers required - compatible with existing displays and any USB and audio peripherals
▶ Supports dual DVI video at 1920x1200 or single 1920x1200	▶ Compatible with standard OS and all applications on host platforms
▶ Full USB support with ability to disable specific USB devices	▶ HD audio support, bi-directional
▶ Low power consumption	▶ Fanless
▶ No moving parts	▶ Centralized management

redhat.

Processor

Teradici 1100P PC-over-IP™

Memory

64Mb/512Mb

Graphics

Video Control Display Data Control (DDC) for automatic setting of resolution and refresh rate

Display

Video Resolution: Supports Dual DVI Video at 1920x1200 or single 1920x1200

Servers Supported

Remote workstations
RDP- Windows Terminal Server 2000, 2003, 2008

Networking

10/100/1000 Mbps Ethernet

Input/Output Support

Two DVI-I ports with one DVI-I to VGA (DB-15) adapter (second adapter is optional)

Four USB 1.1 connectors

One mic-In

Two audio line-out jacks

One RJ45 jack for 10/100/1000 Mbps Ethernet

Protocol Support

PC-over-IP™ and RDP

Remote Management

Devon Connection Manager

Terminal Dimensions

Height: 9.13" (232mm)

Width: 3.7" (94mm)

Length: 6.85" (174mm)

Weight: 2.43lbs (1.10kg)

Power

12v DC

30 watts or less

Current at 115V: 150mA (nominal)

10W (0.8A) DC nominal - using a 36W AC/DC adapter

Current at 200V: 75mA (nominal)

2.5mm inside diameter and 6.5mm outside diameter

One DC-in jack

External power adapter with worldwide autosensing

100-240v VAC, 50/60 Hz support

AC Adapter model #: ADP-36CH BF

Environmental

Environmental with humidity and temperature range

Operating: 0°C – 35°C

Relative Humidity: 5% – 85%

Storage: -40°C – 60°C

Relative Humidity: 5% – 95%

Air Flow: Natural convection - top down with side vents

BTU/hr: At nominal 15W AC power operation – 52 BTU

At full 25W AC power operation – 85 BTU

Sound Level (db): 0 db - fanless with no moving parts

Operating System

Teradici embedded OS

Power Consumption

12W Maximum

10W Average
