

DeTOS Operating System Software

DeTOS™ is an embedded thin client operating system designed to be simple, secure, and centrally manageable. The robust OS offers a wide array of VDI solutions that can meet the demands of any IT environment.

DeTOS™ can be used to access hosted desktops using Microsoft Remote Desktop Services, VMware View, Citrix XenApp or XenDesktop, web based applications, and more.

Award Winning Software

DeTOS providing intuitive user interface to make creating and maintaining remote desktop connections and terminal settings simple, receives the **2013 Reader's Choice 'Preferred Product Award'** for Thin-Client and Zero-Client Computing in the *Virtualization Review*.

DeTOS Features & Benefits

- ✔ Stateless Linux-based OS with RDP/ICA
- ✔ Citrix HDX Ready
- ✔ Embedded Firefox Browser
- ✔ VMware View Certified
- ✔ Manageable by Devon IT Echo™

Simple: Out-of-the-box session configuration is quick and painless using the intuitive web-based control panel with DeTOS™. The same configuration can be set up either locally or configured remotely from the Echo™ management software.

Advanced: DeTOS™ has the ability to connect to hosted desktops using the industry's leading protocols including: VMware View with PCoIP, ICA, and RDP. It also includes a built-in web browser, allowing access to web-based applications or Kiosk usage.

Convenient: Thin clients running DeTOS can detect and connect to the available wireless networks. VPN allows users to work remotely while retaining access to the devices and networks normally accessible from their workspace.

Centralized Management: DeTOS™-based thin clients can be centrally managed using Devon IT's Echo™ thin client management software.
