

DeTOS Operating System Software

DeTOS™ is an embedded thin client operating system designed to be simple, secure, and centrally manageable. The robust OS offers a wide array of remote and virtual desktop solutions that can meet the demands of any IT environment.

DeTOS™ can be used to access virtual desktops using Microsoft Remote Desktop Services, VMware Horizon View, Citrix XenApp or XenDesktop, web based applications, and more.

DeTOS Features & Benefits

- ✓ Stateless Linux-based Operating System
- ✓ Citrix Storefront HDX Ready
- ✓ Embedded Firefox Browser
- ✓ VMware Horizon View Certified. Supports RTAV
- ✓ Microsoft RDP Certified

Simple: Out-of-the-box session configuration is quick and painless using the intuitive control panel with DeTOS™. The same configuration can be set up either locally or configured remotely from the Echo™ management software.

Advanced: DeTOS™ has the ability to connect to hosted desktops using the industry's leading protocols including: VMware Horizon View with PCoIP, Citrix ICA, and Microsoft RDP. It also includes a built-in web browser, allowing access to web-based applications or Kiosk usage.

Centrally Management: DeTOS™-based thin clients can be centrally managed using Echo™ thin client management software.

Citrix Storefront (w/ HDX Real-time): Citrix Storefront with the HDX Real-time Optimization pack supported. Webcam and VoIP applications run without the need of USB redirection.

VMware (RTAV): Real-Time Audio-Video functionality brought by the Horizon View client enables the support of webcams and audio-in and audio-out in Horizon View, without the need to use USB redirection. Analog audio-in devices are also supported.

Cisco AnyConnect VPN: Remotely connect the device back into your company's private network to access internal resources across the globe.
